(84) Designated States (unless otherwise indicated, for every kind of regional protection available): ARIPO (BW, GH,

(54) Title: PROCESS AND PLANT FOR PRODUCING PURE HYDROGEN BY STEAM REFORMING WITH LOW CARBON DIOXIDE EMISSIONS

Fig. 4

(57) Abstract: A process and a plant for producing pure hydrogen by steam reforming of a feed gas containing hydrocarbons, preferably natural gas or naphtha, with reduced carbon dioxide emissions are proposed. The reduction in carbon dioxide emissions is achieved in accordance with the invention in that carbon dioxide is separated both out of a PSA tail gas stream and out of the flue gas from the reformer furnace by means of suitable measures.
