kind of national protection available): AE, AG, AL, AM,

(54) **Title:** ENHANCEMENTS FOR RESOURCE OPTIMIZATION FOR HANDOVER

FIG. 7

(57) **Abstract:** Example embodiments of the present disclosure are directed to configuration transmission in concurrent LTM and conditional handover. A method comprises: at a first apparatus, receiving, from a source network node for a first apparatus, at least one common LTM configuration across a plurality of candidate target cells in a message without duplicates of information elements (IEs) comprising the at least one common LTM configuration, the first apparatus being configured with a conditional handover and LTM concurrently, and the plurality of candidate target cells being selected by the second apparatus for the conditional handover of the first apparatus; and if a target cell is selected from the plurality of candidate target cells for the conditional handover, applying one of the at least one common LTM configuration related to the target cell.
