(54) Title: FLUID DISPENSING SHAVING RAZOR

(57) Abstract: A fluid dispensing shaving razor having a fluid interconnect member with a fluid port extending from a base member at a first end. A cartridge housing mounted to the fluid interconnect member. A fluid applicator is mounted to a second end of the fluid interconnect member. A handle has a first end with a resilient member defining an opening. The fluid port is releasably engaged within the opening of the resilient member. A fluid dispensing shaving razor (10) includes a fluid interconnect member (52) with a fluid port (110) extending from a base member (100) at a first end. A cartridge housing (54) is mounted to the fluid interconnect member (52). A fluid applicator (62) is mounted to a second end of the fluid interconnect member (52). A handle (20) has a first end with a resilient member (252) defining an opening (254). The fluid port (110) is releasably engaged within the opening (254) of the resilient member (252).
