(54) Title: PACKAGING METHOD AND SYSTEM

Fig. 4

(57) **Abstract:** The invention provides a method for the sec-
ondary packaging of ophthalmic lenses for example contact
lenses, contained in individual primary packages (17). The
method including the steps of providing a plurality of single
individual primary packages (17) each containing an ophthal-
mic lens and determining a number of single individual
primary packages (17) to be taken from the plurality of single
individual primary packages (17) and to be packed into a sec-
ondary package (16). The method further includes the steps of
providing a secondary package blank (1) of a size capable of
accommodating the determined number of single individual
primary packages (17) to be packed into the secondary pack-
age (16) and placing each single individual primary package
(17) of the determined number of single individual primary
packages (17) into the secondary package blank (1). The
method further includes the step of folding and closing the
secondary package blank (1) containing the determined num-
ber of single individual primary packages (17) to form the
secondary package (16).
