(54) Title: RODENT TRAP

Fig. 8

(57) Abstract: The disclosure relates to a rodent trap (1) comprising a housing, an inner channel (3), a spring-loaded killing mechanism (10) comprising at least one spring (11) and at least one striker plate (12), a reloader (13), a trigger mechanism, and a bait (15). The housing comprises an opening (3B) into the inner channel and one or more sensors (16) arranged at/in the inner channel and/or the opening for triggering the trigger mechanism if a rodent (400) is detected. The striker plate is configured to move between two positions by means of the spring (11), a first position in which at least a part of the striker plate is arranged at a first side of the inner channel and/or opening leaving the inner channel and/or opening open for passage.
