(54) Title: BLOOD VESSEL PROSTHESIS AND DELIVERY APPARATUS

(57) Abstract: A prosthesis delivery apparatus, a method of delivering a prosthesis, and a prosthesis are provided. The prosthesis (3) is for delivering to the branch region of the ascending aorta (1) and the right and left coronary arteries (12, 13), and it comprises a main conduit (33) and first and second branch conduits (31, 32). The branch conduits (31, 32) are or locating in the right and left coronary arteries (12, 13) respectively upon moving from a first position in which they are located in the main conduit (33) to a second position in which they project out from the main conduit (33). The branch conduits (31, 32) turn inside out as the move from the first position to the second position.
