

MOLECULE HAVING TARGETING FUNCTION AND APPLICATION**ABSTRACT**

The present invention relates to the technical field of medicine, and relates
5 in particular to a molecule having a targeting function. The molecule having a
targeting function can specifically deliver a drug to a specific cell, which
facilitates precise programming of a specific cell in the body, a therapeutic effect
of the drug is produced, and consequently drug dosage and side effects are
greatly reduced, and the effect of precise treatment to cells in the body is
10 achieved.
