(54) Title: LIQUID ANTIMICROBIAL, SKIN MOISTURIZING FORMULATION

(57) Abstract

A liquid antimicrobial, skin moisturizing formulation including: 1) an aqueous alcoholic base; 2) a humectant; 3) a delivery material adapted to release an emollient blend when the formulation is applied to the skin; and 4) an emollient material imiscible in the aqueous alcoholic base and contained by the delivery material. The delivery material is a particulate material that encapsulates or entraps the emollient material for subsequent release. Desirably, the humectant is glycerin and the emollient material is an alkyl-substituted polysiloxane polymer and/or a liquid hydrocarbon emollient.
