

ABSTRACT

AN APPARATUS FOR GENERATING NANOBUBBLES

An apparatus for generating nanobubbles for use with fluid dispensing fittings is described. The apparatus includes a longitudinal shaft having a first end portion, a body and a second end portion. The first end portion and the second end portion are adapted for connection with the body. The first end portion and the second end portion each includes a conical-shaped guide wherein the body comprises airfoil-shaped projecting members arranged circumferentially on the outer circumferential surface of the body.
