(54) Title: CRIMPING OF A FIBROUS WEB TO A TISSUE

## (57) Abstract

The present invention relates to absorbent articles having absorbent cores (16) comprising multiple absorbent layers (10, 16) which are joined to each other. In particular, the present invention relates to absorbent structures which have one of the absorbent layers (16) being shorter in the manufacturing direction than at least one of the other layers (10) and which are joined to one of the other layers (10) by crimping (14). The present invention also relates to a process of crimping of a central patch of a fibrous web to a tissue.
