

ABSTRACT

An object of the invention is to provide a beer-taste
fermented malt beverage with an alcohol concentration of
less than 1% (v/v), which is excellent in robust feeling of
5 drinking, excellent in sweetness in harmony with sourness,
and has beer-like flavor. The means for solving the
problems is a beer-taste fermented malt beverage containing
a wort fermented liquid, having a genuine extract component
of 3.5% (w/w) or more, and an alcohol concentration of less
10 than 1% (v/v).
