

ABSTRACT

Included are: a power transmission unit (1042) for starting power supply to multiple transmission antennas (11) in conjunction with an external switch when the external switch is operated; and an antenna determination unit (1043) for determining a power transmission target antenna with which the power supply from the power transmission unit (1042) is to be continued, from among the multiple transmission antennas (11) to which the power supply has been started.
