Claims:

1. A flavor composition comprising a compound of formula (I) corresponding to the formula

(I)

and edible salts thereof,

wherein

R_1 is an alkyl residue containing 6 to 20 carbon atoms, or an alkene residue containing from 9 to 25 carbon atoms with 1 to 6 double bonds, R_1 together with the carbonyl group to which it is attached is a residue of a carboxylic acid; and wherein the compound according to formula (I) is selected from the group consisting of N-geranoyl-Met, N-palmitoyl-Met, N-palmitenoyl-Met, N-stearoyl-Met, N-linoleoyl-Met and N-linolenoyl-Met.

2. A stock solution comprising 0.01 to 1% by weight of the compound according to claim 1.

3. A stock solution according to claim 2 wherein the solvent is selected from the group consisting of ethanol, triacetine, glycerol and miglyol or mixtures thereof.

4. The use of the flavor composition according to claim 1 in an edible composition.

5. The flavour composition according to claim 1 comprising at least one flavour co-ingredient.

6. The flavour composition according to claim 1 comprising an ingredient selected from the group consisting of sugars, fats, salt, MSG, calcium ions, phosphate ions, organic acids, proteins, purines and mixtures thereof.

7. The flavour composition according to claim 1 comprising a carrier material and an adjuvant.

8. The flavour composition according to claim 7 wherein the adjuvant is an anti-oxidant.

9. The flavour composition according to claim 1 in the form of an emulsion.

10. The flavour composition according to claim 1 in the form of a powder.

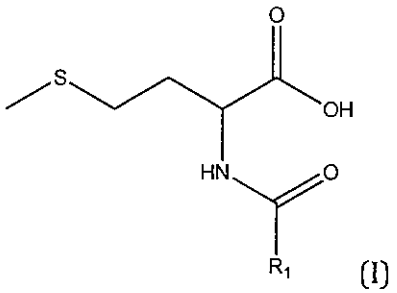

11. An edible composition comprising the flavour composition according to claim 1.

12. A caloric or non-caloric beverage according to claim 11 containing carbohydrate sweeteners, selected from sucrose, high fructose corn syrup, fructose and glucose, or high intensity, non-nutritive sweeteners selected from aspartame, acesulfame K, sucralose, cyclamate, sodium saccharin, neotame, rebaudioside A, and/or other stevia-based sweeteners, comprising a flavour composition according to claim 1.

13. A soy-based edible composition according to claim 11 comprising a flavour composition according to claim 1.

Claims:

1. A stock solution comprising 0.01 to 1% by weight of a compound of formula (I) corresponding to the formula

(I)

and edible salts thereof,

wherein

R_1 is an alkyl residue containing 6 to 20 carbon atoms, or an alkene residue containing from 9 to 25 carbon atoms with 1 to 6 double bonds, R_1 together with the carbonyl group to which it is attached is a residue of a carboxylic acid; and wherein the compound according to formula (I) is selected from the group consisting of N-geranoyl-Met, N-palmitoyl-Met, N-palmitenoyl-Met, N-oleoyl-Met, N-stearoyl-Met, N-linoleoyl-Met and N-linolenoyl-Met.

2. A stock solution according to claim 1 wherein the solvent is selected from the group consisting of ethanol, triacetine, glycerol and miglyol or mixtures thereof.

3. The stock solution according to claim 1 comprising at least one flavour co-ingredient.

4. The stock solution according to claim 1 comprising an ingredient selected from the group consisting of sugars, fats, salt, MSG, calcium ions, phosphate ions, organic acids, proteins, purines and mixtures thereof.

5. The stock solution according to claim 1 comprising a carrier material and an adjuvant.

6. The stock solution according to claim5 wherein the adjuvant is an anti-oxidant.

7. A caloric or non-caloric beverage containing carbohydrate sweeteners, selected from sucrose, high fructose corn syrup, fructose and glucose, or high intensity, non-nutritive sweeteners selected from aspartame, acesulfame K, sucralose, cyclamate, sodium saccharin, neotame, rebaudioside A, and/or other stevia-based sweeteners, comprising a stock solution according to claim 1.

8. A soy-based edible composition comprising a stock solution according to claim 1.
