

# **BIOMETRIC FEATURE ATTACK OBJECTS AND BIOMETRIC FEATURE ATTACK TEST SYSTEMS**

## **ABSTRACT**

Embodiments of the present specification provide a biometric feature attack  
5 object and a biometric feature attack test system. The biometric feature attack object  
includes a substrate, a biometric feature attachment part, and a conductive part. The  
substrate includes a biometric feature carrying area and a pressing area, and the  
biometric feature carrying area and the pressing area are respectively disposed on two  
opposite sides of the substrate. The biometric feature attachment part is disposed in  
10 the biometric feature carrying area, and the conductive part is disposed in the pressing  
area or the biometric feature carrying area.
