(54) Title: A CONNECTION SYSTEM

(57) Abstract: A system for electrical connection of a supply and a load comprising a plug having a plurality of contacts in electrical connection to the load; a socket having a plurality of contacts adapted for electrical connection to the plug contacts; wherein the socket contacts are adapted to be connected to the supply only when the plug and socket are in immediate proximity and/or in contact. An indicator may be provided which is activated when the supply is connected to the contact(s). The socket and plug may be separated provided.
