(54) Title: SYSTEM AND METHOD FOR AUTOMATICALLY ENTERING AND LEAVING RIDE APPARATUS

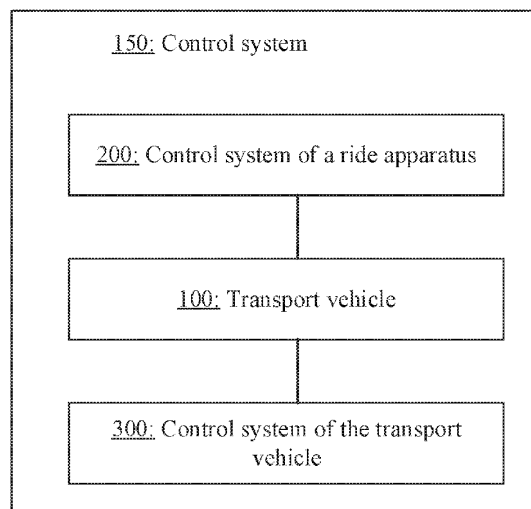

FIGURE 1

(57) Abstract: The present disclosure provides systems and methods for automatically entering and leaving a ride apparatus. A method for automatically entering a ride apparatus comprises: establishing a wireless communication connection with a control system of the ride apparatus; sending, via the wireless communication connection, an automatic entering request to the control system, the automatic entering request comprising a ride starting position; receiving, via the wireless communication connection, status information sent by the control system; and determining, according to the status information, that the ride apparatus has arrived at the ride starting position, and automatically entering the ride apparatus.
