

ABSTRACT OF THE DISCLOSURE

LARGE PORE POLYMERIC MEMBRANE

Porous membranes including a first microporous skin surface having a pore density of at least about 20 pores/50,000 μm^2 , and a second porous surface, and a bulk between the surfaces, wherein the bulk has a pore density of at least about 120 pores/ mm^2 , as well as methods of using and methods of making the membranes are disclosed.
