(54) Title: SYSTEM FOR MULTIMEDIA RENDERING IN A PORTABLE DEVICE

(57) Abstract: A multimedia system for rendering multimedia content in a portable device having an embedded processor. The portable device includes one or more rendering resources. A method is provided that performs operations of generating a multimedia object based on the multimedia content, associating a format handler with the multimedia object, and controlling a selected rendering resource using the format handler to render the multimedia content from the multimedia object.
