(54) Title: DYNAMIC SUSPENSION DRYING (DSD) TO CONTROL OSTWALD RIPENING

Figure 1 - Dynamic Suspension Drying Schematics

(57) Abstract: The present invention relates to a process for the control of Ostwald Ripening phenomenon occurring in particle sus-
pensions without the need for addition of stabilizing agents, by using high pressure homogenization at mild conditions in a way that
no increase or decrease in particle size occurs, thus allowing the stabilization of the suspension during the isolation step in the form
of a dried powder.
