

DIVING MASK ENABLING PRESSURE EQUALISATION AT THE EARS**ABSTRACT**

5

A diving mask (1) comprising a body (10) provided with a faceplate (20) comprising an upper part (21), and a flexible skirt including a partition delimiting an upper chamber (45) for viewing from a lower chamber (50) for breathing, the partition being arranged to be supported above the nose. The mask (1) comprises a snorkel (70) disposed in the extension of an upper part (10a) of the body (10). The body (10) comprises a flexible and deformable main nasal part (15), the upper edge (15a) of which is secured in a sealed manner to the lower edge (21a) of the upper part (21) of the faceplate (20). The main nasal part (15) further comprises a main housing (16) receiving the nose and configured in such a way as to allow the pinching of the nose of the user.
