CD3-BINDING MOLECULES CAPABLE OF BINDING TO HUMAN AND NON-HUMAN CD3

Abstract

CD3-binding molecules capable of binding to human and non-human CD3, and in particular to such molecules that are cross-reactive with CD3 of a non-human mammal (e.g., a cynomolgus monkey) are presented. Uses of such antibodies and antigen-binding fragments in the treatment of cancer, autoimmune and/or inflammatory diseases and other conditions are presented.
