Instant Poll

- User Create
1. User in urgent need of a poll data on a subject matter before an important meeting, decision or project submission.

2. Create new poll:

Step 1: Poll Question

Step 2: Marketplace & Profile

Step 3: Sample Size

3. Submit and wait for response in 1 hour(for example)

- User wait for response
1. Poll engine randomly pick samples according to profile requested but over sample by 2x(for other suitable number), push request to relevant members

2. Poll engine monitors progress of poll, once sample size reached, poll stopped, and result pushed to requester

3. If not push another 2x (or other suitable number) requests to same population

4. Continue with 3 until request fulfilled within the time limit
