ABSTRACT

IMMEDIATE RELEASE PHARMACEUTICAL FORMULATION

An immediate release pharmaceutical formulation comprising, as active ingredient, a compound of formula (I):

(I)

wherein

R^1 represents C_{1-2} alkyl substituted by one or more fluoro substituents;

R^2 represents hydrogen, hydroxy, methoxy or ethoxy; and

n represents 0, 1 or 2;

and a pharmaceutically acceptable diluent or carrier;

provided that the formulation does not solely contain:

- a solution of one active ingredient and water;
- a solution of one active ingredient and dimethylsulphoxide; or
- a solution of one active ingredient in a mixture of ethanol : PEG 660 12-hydroxy stearate : water 5:5:90;

such formulations being of use for the treatment of a cardiovascular disorder.
