(54) Title: SPACE ARRANGEMENT, CONSTRUCTION ELEMENT AND METHOD FOR CLIMATE REGULATING THE SPACE

(57) Abstract: The present invention relates to a spatial arrangement which comprises a basin (1) as well as a cupola-like structure (2) to be arranged over the basin. Said cupola-like structure (2) is arranged so that its edges (4) essentially follow the basin's (1) edges (3). An apparatus (6) for regulating the local climate is connected to the space provided by said arrangement, by means of which apparatus (6) the climate prevailing within the cupola-like structure can be locally regulated. The present invention also relates to such a structure as well as to a method for regulating the climate within a structure.
