

Figure 1:

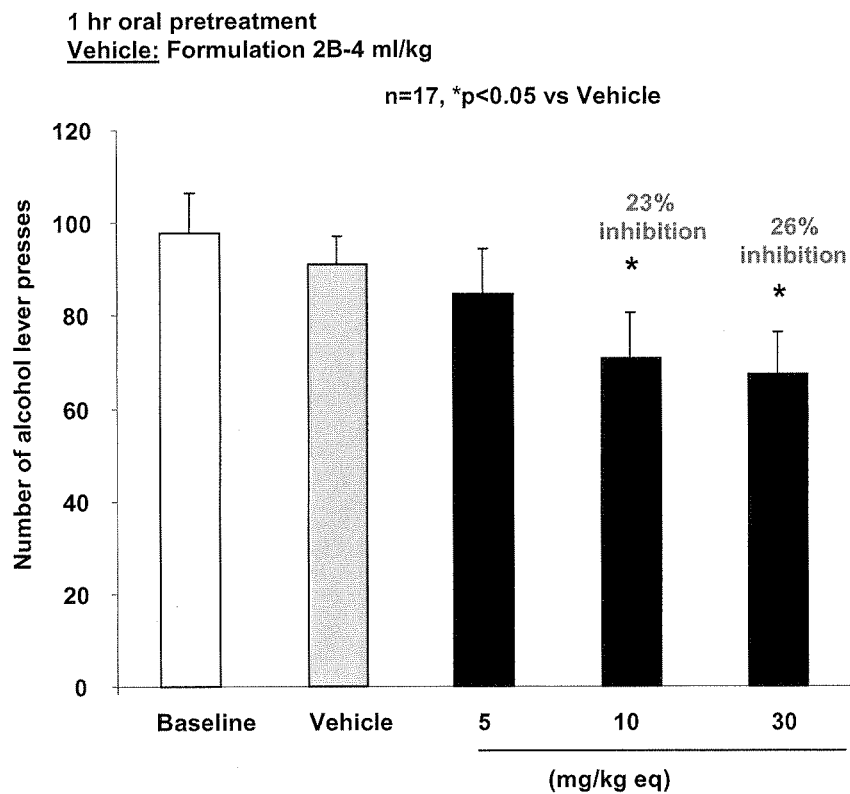

Oral compound of Example 5 significantly reduced alcohol self administration

Figure 2

Cocaine cue reinstatement study design

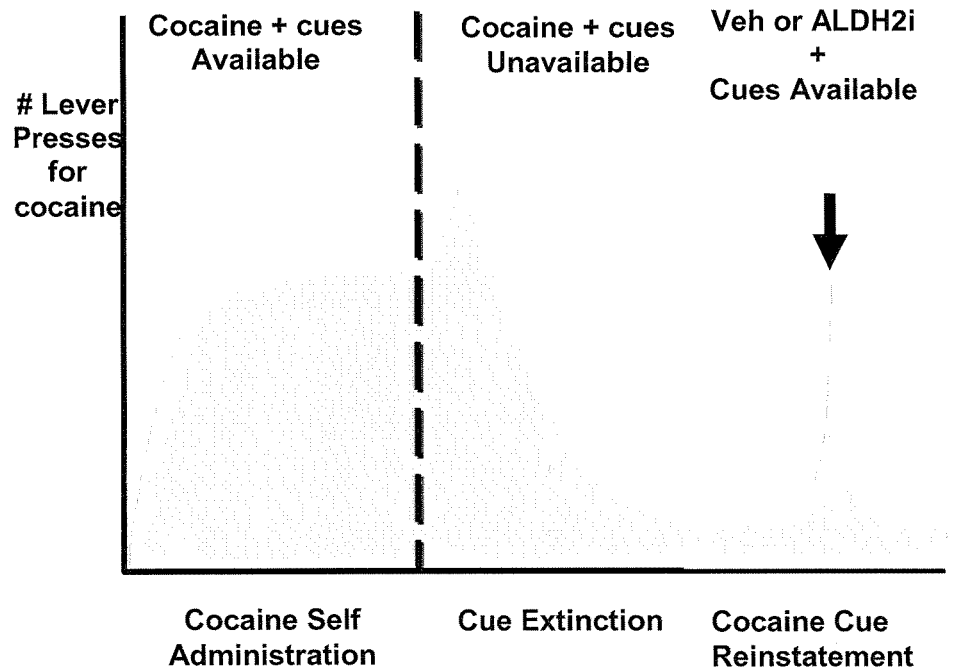

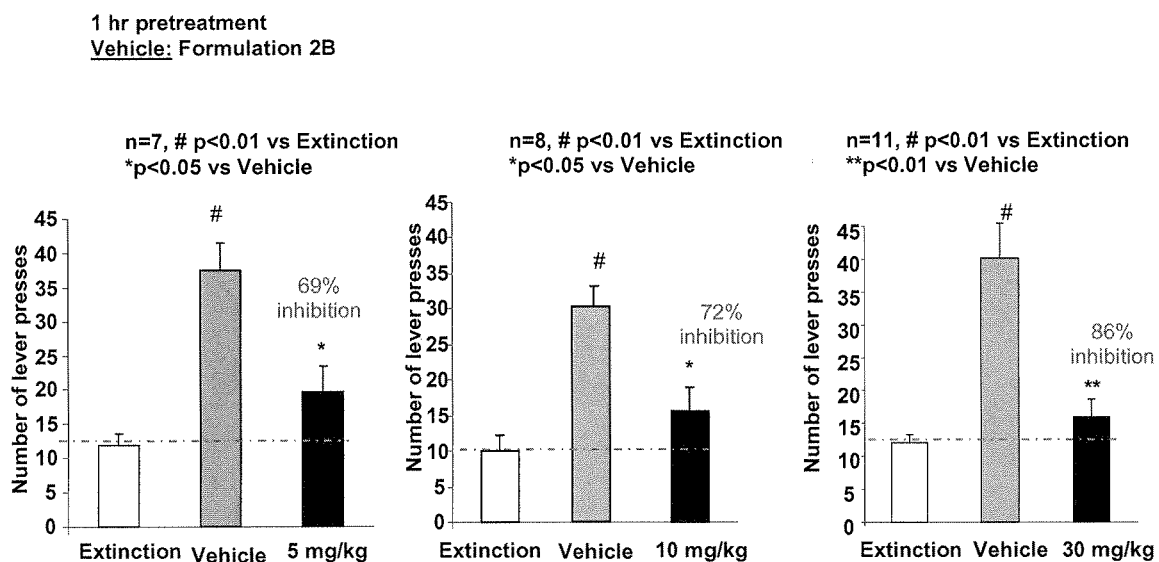

Figure 3**Oral compound of Example 2 significantly inhibited cocaine cue reinstatement**

Figure 4

Oral compound of Example 5 significantly inhibited cocaine cue reinstatement

1 hr pretreatment
Vehicle: Formulation 2B

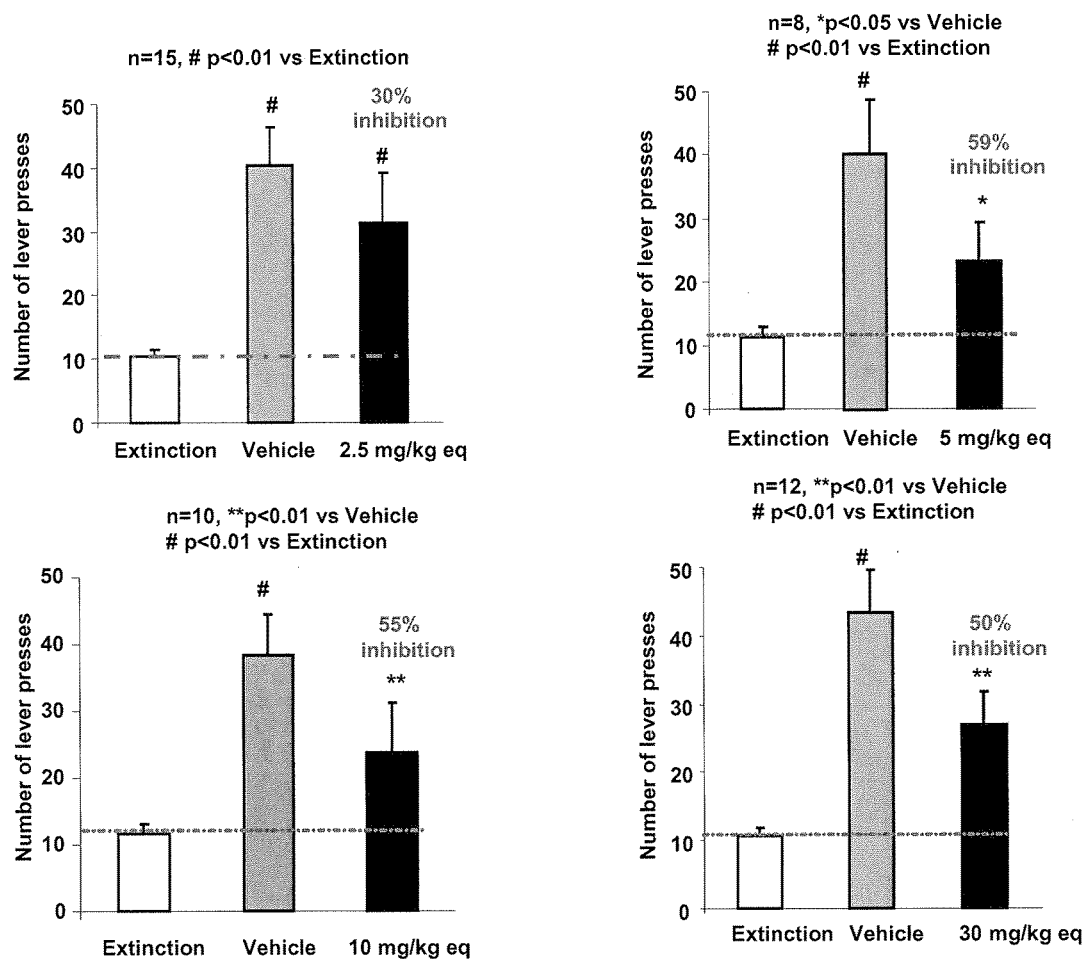

Figure 5

Oral compound of Example 2 significantly reduced nicotine self administration

1 hr oral pretreatment

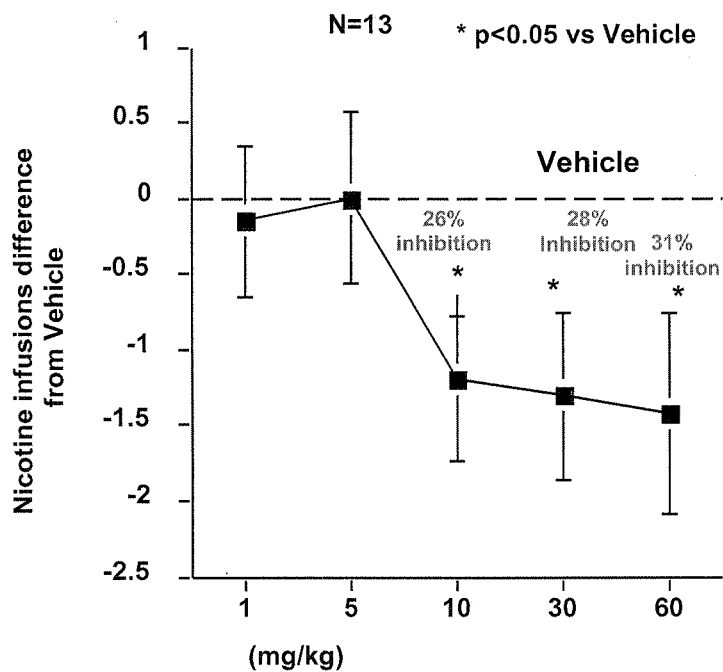

Vehicle: Formulation 2B - 4 ml/kg

Figure 6

Acute oral Compound of Example 5 significantly reduced nicotine self administration

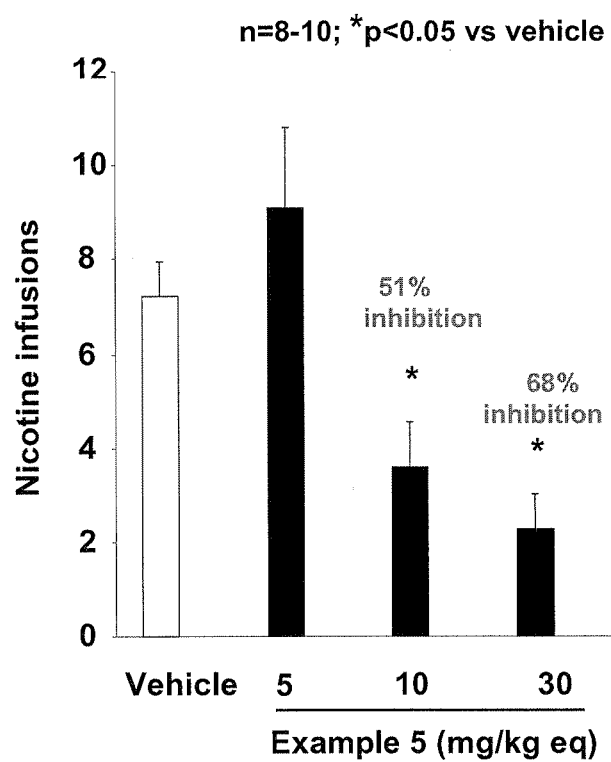

Figure 7

Chronic oral Compound of Example 5 significantly reduced nicotine self administration
