(54) Title: SMOKABLE FILLER MATERIAL FOR SMOKING ARTICLES		
(57) Abstract The invention relates to a smoking article smokable filler material which comprises a proportion of a non-tobacco, plant material which has an initially high fat or high oil content. The high fat or high oil containing material in combination with a non-combustible inorganic filler, a binder, and an aerosol generating source provides a smokable filler material which may also have a low coal static peak burning temperature.
