

ABSTRACT

According to an embodiment, an information processing apparatus includes an image interface, an input interface, a display interface, a manipulation interface, a storage
5 unit, and a processor. The processor is configured to cause a display terminal through a display interface to display a screen so as to receive an input of a key through the manipulation interface; transmit an operation signal indicating the key to the one of external devices
10 through the input interface; and when the key is a repeat key, transmit an operation signal for inputting a character string indicated by repeat information to the one of the external devices through the input interface.
