ServingCellConfig field descriptions
downlinkChannelBW-PerSCS-List A set of UE specific carrier configurations for different subcarrier spacings (numerologies). Defined in relation to Point A. Corresponds to L1 parameter 'offset-pointA-set' (see 38.211, clause FFS_clause). If absent, UE uses the configuration indicated in <i>scs-SpecificCarrierList</i> in <i>DownlinkConfigCommon / DownlinkConfigCommonSIB</i> . The UE ignores <i>offsetToCarrier</i> present in this list and uses <i>offsetToCarrier</i> indicated in <i>scs-SpecificCarrierList</i> in <i>DownlinkConfigCommon / DownlinkConfigCommonSIB</i> .
