

CONTROL SYSTEM FOR VEHICLE

5

ABSTRACT OF THE DISCLOSURE

10 A control system (80) for a vehicle comprises an
automated driving control part (90) configured to
automatically perform driver assistance operations for
which the driver has given permission among a plurality
of driver assistance operations. The automated driving
control part (90) comprises a package determining part
15 (91) using at least one of the surrounding environment
information, the host vehicle information, and the driver
information as the basis to determine a driver assistance
package packaging permissions for a plurality of driver
assistance operations and a package proposing part (92)
20 proposing to the driver to switch to a driver assistance
package so as to obtain permissions for the individual
driver assistance operations permitted in the driver
assistance package.
