(54) Title: SOLID GRANULES USED FOR CLEANING AGENTS

(57) Abstract: A solid granule or granular material used for cleaning agents includes an anionic surfactant component and a molding agent. The anionic surfactant component includes an anionic sulfonate surfactant and an anionic fatty alcohol-based sulfate surfactant. Based on the total amount of the cleaning granule being 100 wt%, the combined amount of the sulfonate surfactant and the sulfate surfactant is between 15.0 wt% and 100 wt%. The amount of molding agent is 5.0 wt% or less. The ratio of the sulfonate surfactant to the sulfate surfactant is 0.20 to 0.75, inclusive. A cohesion of the solid granule is between 1000 g/mm and 4000 g/mm.
