

[Abstract]

[Problem] To provide a message communication program that causes a computer to execute processing of receiving text-format information from a transmission source and that makes it possible to transmit a message in accordance with a feature in the information and a form of communication with a transmission destination.

[Solution] A message communication program of the disclosure causes a computer to execute a process comprising: receiving information at least a part of which is text-format information from a transmission source (S102); determining whether a section having a specific feature is present in the text-format information (S104); converting, when it is determined that a section having the feature is present, a part or an entirety of the text-format information into a message with a format in accordance with the feature and a communication protocol to be used for communication with a transmission destination (S106); and transmitting the message to the transmission destination (S108).
