

ABSTRACT**Portable Apparatus for Enabling Reproduction of Television**

5 Apparatus for enabling reproduction of television on a host. The apparatus
comprises an interface to allow power to be supplied to the apparatus from the
host, executable commands signals to be received by the apparatus from the host,
and processed television signals to be sent to the host from the apparatus. Also
provided is a non-volatile memory; and a micro control unit for processing the
10 control signals and for sending the processed television signals, as well as
controlling the non-volatile memory. The apparatus further comprises a television
tuner for receiving television signals, processing the received television in
accordance with executable commands received from the host, and sending the
processed television signals to the micro control unit for sending to the host.
