

DISTRIBUTION DEVICE FOR AN EXTRUDER**Abstract**

5 The present invention relates to a distribution device (1) for an extruder (10),
comprising at least two conduits (3, 4) leading away from a distribution unit (2),
each conduit (3, 4) having a temperature-control device (3b, 4b). The present
invention further relates to an extrusion system comprising a distribution
device (1) of the above kind and to a method for producing a proteinaceous
10 food item by means of the extrusion system.
