

Laundry Pole Guider

Abstract

5 This invention relates to a pole guide for a laundry pole holder mounted to a substantially flat base. The pole guide has a conical receptacle member having a wide open end defining an entrance and a narrow open end. A tubular member extends from the narrow open end of the conical receptacle member and defines a passageway for a tubular extension of the laundry pole holder to be inserted therethrough. When the pole guide is
10 installed to the laundry pole holder, the conical receptacle member assists a user by guiding a laundry pole into the laundry pole holder.
