(54) Title: METHOD OF MAKING A TUBULAR MEMBER FOR OPTICAL FIBER PRODUCTION USING PLASMA OUTSIDE  
VAPOR DEPOSITION

## (57) Abstract

A plasma gas flows along a gas line (42) to a plasmatron torch (40). A source gas also flows to the plasmatron torch (40) along a line (44). This creates a reaction product which deposits onto a target (34). This creates a tubular body, which can be used to make optical fibers.
