(54) **Title:** PROCESS FOR SELECTION OF RESOURCES TO BE RELEASED IN CASE OF AN OVERLOAD IN A CELLULAR LAND MOBILE SYSTEM

Fig. 2

(57) **Abstract:** Process and land mobile system for operating a cellular land mobile network in which in case of an overload certain resources of the land mobile network currently being used can be released in order to be available for higher priority applications, and resources can be usable at the same time by several applications, characterized in that selection of the resource to be released takes place, for all resources under consideration an efficiency factor being determined and the resource with the lowest efficiency factor being released.
