(54) Title: ANTAGONISTIC ANALOGS OF GH-RH INHIBITING IGF-I AND -II

(57) Abstract: There is provided a novel series of synthetic analogs of hGH-RH(1-29)NH_2. These analogs inhibit the activity of endogenous hGH-RH, and therefore prevent the relase of growth hormone. The stronger inhibitory potencies of the new analogs, as compared to previously described ones, results from replacement of various amino acids.
