

Sealing Label With Identification Function and Container Wrapped With Said Sealing Label

ABSTRACT

Provided is a sealing label providing superior identification function,
5 greater convenience of use and achieving manufacturing cost reduction. A
container wrapped with such sealing label is also provided. In a sealing label
for wrapping a container including a container body and a lid portion, the
sealing label includes an upper region covering the lid portion, a lower region
10 covering the container body, a cutaway region disposed between the upper
region and the lower region, and a tear-off line provided in a boundary between
the cutaway region and the lower region as well as in a boundary between the
cutaway region and the upper region. An identifying mark comprised of a
shape, a pattern, a color or any combination thereof is provided to the lower
15 region and a further identifying mark same as or similar to the identifying
mark is provided to the upper region, a region comprised of the upper region
and the cutaway region or a region comprised of the upper region, the cutaway
region and the lower region, thereby to allow recognition of integrity between
the lid portion and the container body.
