(54) Title: A SPIRAL RING FULL ROAD INTERCHANGE SYSTEM

(57) Abstract: The present disclosure is directed to providing a spiral road junction system. More specifically the present disclosure relates to a system for connecting a plurality of highway spokes via a spiral road junction comprising adjacent-spoke connecting roads associated with each highway spoke, and a ring-road interchange traversing all the highway spokes. The ring-road interchange provides a continuous path from a slip road diverging from an entry highway spoke to an access road merging with an exit highway spoke.
