

Abstract

Method for Paging, and Access Network Device, Terminal Device and Core Network Device

5

Disclosed are a method for paging, and an access network device, a terminal device and a core network device. The method comprises: a first access network device acquiring a tracking area list of a terminal device; and the first access network device determining, according to the tracking area list, a target paging area of the first access network device initiating paging to the terminal device. The method, and the access network device, the terminal device and the core network device in the embodiments of the present application are beneficial to the reasonable configuration of a paging area by means of the access network device, thereby reducing the signaling overhead.
