

CLAIMS

WHAT IS CLAIMED IS:

1. A kit comprising:
 - a) at least one male condom;
 - b) at least one wearable constriction device that is physically separate from the condom, wherein the at least one wearable constriction device forms a single opening;
and
 - c) a single package comprising a first internal compartment and a second internal compartment, wherein the at least one male condom is contained in the first compartment, and the at least one constriction device is contained in the second compartment.
2. The kit of claim 1, wherein the kit comprises at least two constriction devices.
3. The kit of claim 2, wherein the at least two constriction devices comprise at least two rings.
4. The kit of claim 3, wherein each ring has an internal diameter that is different than the internal diameter of the other ring.
5. The kit of claim 3, wherein the at least two wearable rings are detachably coupled to each other by at least one extension.
6. The kit of claim 3, wherein the at least two wearable rings are detachably coupled to each other by at least two extensions.
7. The kit of claim 1, wherein the at least one constriction device comprises a ring.
8. The kit of claim 1, wherein the at least one wearable constriction device is made from silicone.
9. The kit of claim 1, wherein the at least one wearable constriction device is made from

silicone.

10. A kit comprising:

a) at least one male condom;

b) at least one wearable constriction device that is physically separate from the condom, wherein the at least one wearable constriction device forms a single opening; and

c) a single package comprising at least one internal compartment, wherein the at least one condom and the at least one wearable constriction device are contained in the at least one internal compartment.

11. The kit of claim 10, wherein the kit comprises at least two constriction devices.

12. The kit of claim 11, wherein the at least two constriction devices comprise at least two rings.

13. The kit of claim 12, wherein each ring has an internal diameter that is different than the internal diameter of the other ring.

14. The kit of claim 12, wherein the at least two wearable rings are detachably coupled to each other by at least one extension.

15. The kit of claim 12, wherein the at least two wearable rings are detachably coupled to each other by at least two extensions.

16. The kit of claim 10, wherein the at least one constriction device comprises a ring.

17. The kit of claim 10, wherein the at least one constriction device is made from silicone.

18. A kit comprising:

a) at least one male condom, the at least one male condom having: i) a condom base; and ii) at least one tubular sheath;

b) at least one wearable constriction device that is physically separate from the condom, wherein the at least one wearable constriction device are physically separate from each other; and

c) a single package comprising at least one internal compartment, wherein the at least one condom and the at least one wearable constriction device are contained in the at least one internal compartment.

19. The kit of claim 18, wherein the kit comprises at least two constriction devices.

20. The kit of claim 19, wherein the at least two constriction devices comprise at least two rings.

21. The kit of claim 20, wherein each ring has an internal diameter that is different than the internal diameter of the other ring.

22. The kit of claim 18, wherein the at least one constriction device comprises a ring.

23. The kit of claim 18, wherein the at least one constriction device is made from silicone.

24. A kit comprising:

a) at least one male condom, the at least one male condom having: i) a condom base; and ii) a tubular sheath;

b) at least one wearable constriction device that is physically separate from the condom, wherein the at least one wearable constriction device are physically separate from each other; and

c) a single package comprising a first internal compartment and a second internal compartment, wherein the at least one male condom is contained in the first compartment, and the at least one constriction device is contained in the second compartment.

25. The kit of claim 24, wherein the kit comprises at least two constriction devices.
26. The kit of claim 25, wherein the at least two constriction devices comprise at least two rings.
27. The kit of claim 26, wherein each ring has an internal diameter that is different than the internal diameter of the other ring.
28. The kit of claim 24, wherein the at least one constriction device comprises a ring.
29. A kit comprising:
- a) at least one male condom having: i) a condom base; and ii) a tubular sheath;
 - b) at least one wearable uninterrupted ring that is physically separate from the condom; and
 - c) a single package comprising at least one internal compartment, wherein the at least one condom and the at least one wearable ring are contained in the at least one internal compartment.
30. The kit of claim 29, wherein the kit comprises at least two wearable rings.
31. The kit of claim 30, wherein the at least two wearable rings are detachably coupled to each other by at least one extension.
32. The kit of claim 31, wherein the at least two wearable rings are detachably coupled to each other by at least two extensions.
33. The kit of claim 30, wherein each ring has an internal diameter that is different than the internal diameter of the other ring.
34. The kit of claim 29, wherein the package comprises a first internal compartment and a second internal compartment, and the at least one male condom is contained in the first

compartment, and the at least one wearable ring is contained in the second compartment.

35. The kit of claim 34, wherein the at least two wearable rings are detachably coupled to each other by at least one extension.

36. The kit of claim 35, wherein the at least two wearable rings are detachably coupled to each other by at least two extensions.

37. The kit of claim 29, wherein the at least one wearable ring is made from silicone.

38. A kit comprising:

- a) at least one male condom having: i) a condom base; ii) a tubular sheath; and iii) a reservoir tip;

- b) at least two wearable, uninterrupted silicone rings that are physically separate from the condom and are not directly coupled to each other, each ring having an internal diameter that is different than the internal diameter of the other ring; and

- c) a single package comprising a first internal compartment and a second internal compartment, wherein the at least one male condom is contained in the first compartment, and the at least two wearable rings are contained in the second compartment.

39. The kit of claim 29, wherein the at least one ring is detachably coupled to the condom base by at least one extension.

40. A kit comprising:

- a) at least three male condoms; and

- at least three wearable constriction devices that are physically separate from the condoms;

wherein the at least three male condoms are individually packaged in separate compartments, and, the at least three wearable constriction devices are packaged together in a single compartment that is separate from the three male condom compartments.

41. The kit of claim 40, wherein the at least three constriction devices each comprise a single ring.

42. The kit of claim 41, wherein each ring has an internal diameter that is different than the internal diameter of the other rings.

43. The kit of claim 41, wherein the at least three wearable rings are detachably coupled to each other by at least one extension.

44. The kit of claim 41, wherein the at least three wearable rings are detachably coupled to each other by at least two extensions.

45. The kit of claim 40, wherein the at least three wearable constriction devices are made from silicone.

46. A kit comprising:

a) at least three male condoms; and

b) at least three wearable constriction devices that are physically separate from the condoms;

wherein the at least three male condoms are individually packaged in separate compartments, and, the at least three wearable constriction devices are packaged individually in separate compartments that are also separate from the three male condom compartments.

47. The kit of claim 40, wherein the at least three constriction devices each comprise a single ring.

48. The kit of claim 41, wherein each ring has an internal diameter that is different than the internal diameter of the other rings.

49. The kit of claim 41, wherein the at least three wearable rings are detachably coupled to each other by at least one extension.

50. The kit of claim 41, wherein the at least three wearable rings are detachably coupled to each other by at least two extensions.

51. The kit of claim 40, wherein the at least three wearable constriction devices are made from silicone.
