(54) Title: SYSTEM AND METHOD FOR VERIFYING THE INTEGRITY OF STORED INFORMATION WITHIN AN ELECTRONIC DEVICE

(57) Abstract: In one embodiment, a digitally signed image is embodied in a memory component such as a non-volatile memory. The digitally signed image comprises a post-relocation image and a digital signature. The post-relocation image is an image of a software module altered by a symmetrical relocation function by loading of the image into the memory component. The digital signature is based on the image so that it can be used to analyze data integrity.
