(54) Title: IMAGE PRINTING ORDER RECEIVING SYSTEM AND METHOD

(57) Abstract: In a print order receiving system, a first output receiving server receives an order of a print output at every captured image data obtained by imaging apparatus; an image storing server stores the captured image data; and a first print out apparatus prints out an initial printed matter, and the first print out apparatus supplies the initial printed matter to a shipping terminal. An order receiving server receives a reorder of the printed matter from a user terminal; a charging and settlement server performs the charging and settlement of the printed matter; and the first print out apparatus prints the image data to generate later printed matter when a reorder is received, and the first print out apparatus supplies the later printed matter to the shipping terminal.
