(54) Title: METHODS AND APPARATUS TO REGISTER WITH EXTERNAL NETWORKS IN WIRELESS NETWORK ENVIRONMENTS

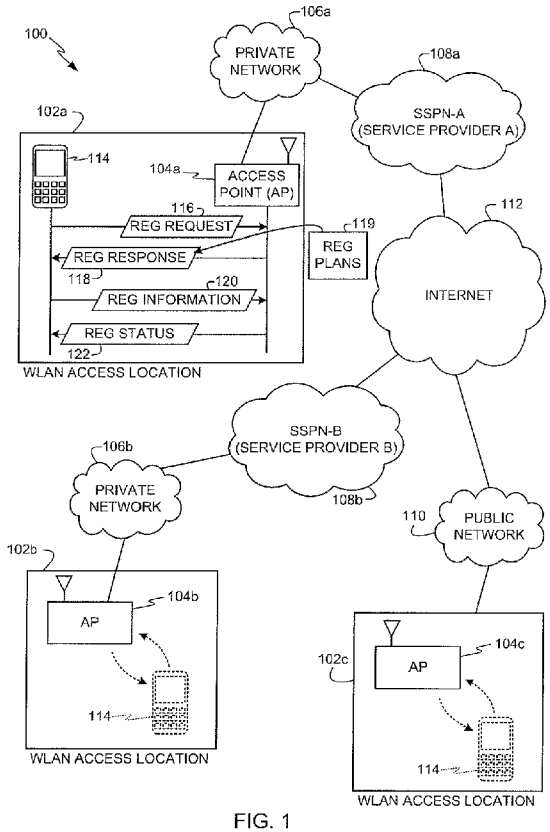

FIG. 1

(57) Abstract: Example methods and apparatus to register with external networks in wireless network environments are disclosed. A disclosed example method involves sending a registration request from the device to a network entity and receiving a registration response at the device. The registration response indicates one or more registration plans. The example method also involves selecting a registration plan from the one or more registration plans and sending registration information associated with the device to the network entity. The registration information is selected based on the selected registration plan.
