(54) Title: METHOD AND APPARATUS FOR APPLICATION PROCESSING, AND DEVICE AND STORAGE MEDIUM

(54) 发明名称: 用于应用处理的方法、装置、设备和存储介质

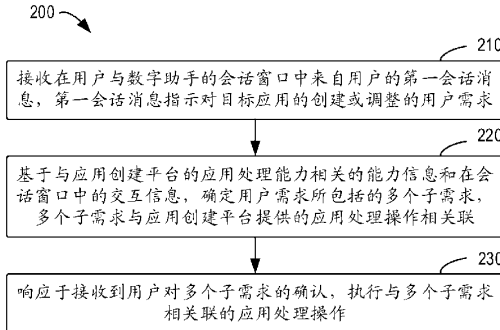

图 2

210 Receive a first session message from a user in a session window between the user and a digital assistant, wherein the first session message indicates a user requirement for the creation or adjustment of a target application

220 On the basis of capability information related to an application processing capability of an application creation platform and interaction information in the session window, determine a plurality of sub-requirements comprised in the user requirement, wherein the plurality of sub-requirements are associated with application processing operations provided by the application creation platform

230 In response to a confirmation made by the user regarding the plurality of sub-requirements being received, execute the application processing operations associated with the plurality of sub-requirements

(57) Abstract: The embodiments of the present disclosure provide a method and apparatus for application processing, and a device and a storage medium. The method comprises: receiving a first session message from a user in a session window between the user and a digital assistant, wherein the first session message indicates a user requirement for the creation or adjustment of a target application; on the basis of capability information related to an application processing capability of an application creation platform and interaction information in the session window, determining a plurality of sub-requirements comprised in the user requirement; and in response to a confirmation made by the user regarding the plurality of sub-requirements being received, executing application processing operations associated with the plurality of sub-requirements. Thus, a user requirement can be conveniently clarified by means of interaction with a digital assistant during an application creation or adjustment process, and the user requirement is disassembled into specific sub-requirements that can be supported and implemented by an application creation platform, thereby helping to ensure that the user requirement matches

本国际公布:
— 包括国际检索报告(条约第21条(3))。
a platform capability, and improving the usage experience of a user.

(57) 摘要: 本公开的实施例提供了用于应用处理的方法、装置、设备和存储介质。该方法包括: 接收在用户与数字助手的会话窗口中来自用户的第一会话消息, 第一会话消息指示对目标应用的创建或调整的用户需求; 基于与应用创建平台的应用处理能力相关的能力信息和在会话窗口中的交互信息, 确定用户需求所包括的多个子需求; 以及响应于接收到用户对多个子需求的确认, 执行与多个子需求相关联的应用处理操作。由此, 可以在应用创建或调整过程中通过与数字助手的交互来方便地明确用户需求, 将用户需求拆解为应用创建平台所能支持和实现的具体子需求。这有助于确保用户需求与平台能力之间的匹配性, 提升用户使用体验。
