(54) Title: AEROSOL CAN

(57) Abstract: In accordance with an example embodiment, there is disclosed herein, an apparatus that comprises a container having an interior space configured to hold a pressurized fluid to dispense aerosolized. The container further comprises a first end and a second end. The first end of the container is configured to dispense the contents of the pressurized fluid. The second end of the container is shaped like an inverted dome and has an adapter that provides access to the interior space of the container. The adapter at the second end of the container can be employed to depressurize the container and/or to refill the container.
