(54) Title: SYSTEMS AND METHODS FOR TARGET BRIDGING

FIG. 1

(57) Abstract: The present disclosure relates to target bridging technology which enables a payer of a first service provider to present a target of a second service provider to a receiver of the second service provider who does not recognize a target of the first service provider. The inventive system for target bridging service involves all or some of a portable device of the payer, a first management system of the first service provider, a scanning system of the receiver, a second management system of the second service provider, a bridging system of a bridging service provider and a target generator.
