(54) Title: POLYMER COMPOSITIONS, METHODS OF MAKING THE SAME, AND ARTICLES PREPARED FROM THE SAME

(57) Abstract: The invention provides a composition comprising a first composition, which first composition comprises the following: A) a first interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; B) a second interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; and wherein the first composition has an $[(ML(1+4, 125^{\circ}C))/Mw(conv)]*1000$ greater than 0.429 mole/g. The invention also provides a composition comprising a first composition, which first composition comprises the following: A) a first interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; B) a second interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; and wherein the first composition has a Mooney Viscosity ($ML, 1+4, 125^{\circ}C$) greater than, or equal to, 70, and has a low shear viscosity (η at 0.1 rad/sec) less than, or equal to, 100,000 Pa $\cdot$ sec. The invention also provides a composition comprising a first composition, which first composition comprises the following: A) a first interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; B) a second interpolymer comprising, in polymerized form, ethylene, an α -olefin and a nonconjugated polyene; and wherein the first composition has a Mooney Viscosity ($ML(1+4, 125^{\circ}C)$) greater than, or equal to, 70, and has an $[Mw(abs)]/[Mw(conv)]$ less than 1.2.
