(54) Title: PREMOISTENED TISSUE PRODUCTS

(57) Abstract: Premoistened wiping products are disclosed. The premoistened wiping products contain one or more wetlaid tissue webs. The tissue webs may contain an additive composition which includes a thermoplastic resin. Once the additive composition is applied to the web, the web is embossed forming liquid resistant embossments. The embossments also form bond areas that can bond multiple plies of the tissue webs together. Once embossed, the one or more tissue webs are then contacted with a wiping solution in order to form the premoistened product.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
