

LIQUID PUMP

Abstract of the Disclosure

5 An improvement in reciprocable liquid pump
construction to facilitate maintenance and repair of
certain high-wear pump components without the necessity
of removing the pump from the work site. The pump has a
threadable and removable cylinder (34), intake housing
(36), piston (46), piston packing and glands (50), piston
and inlet ball checks and seats, and ball check housings
10 (48).
